Topics Covered

1 Introduction

2 Features & Functionality

3 Diagrams

4 Technologies

5 Design & Implementation

6 Future Work & Conclusion

Introduction

- Evently is a comprehensive Event Management System that addresses the multifaceted challenges of modern event planning.
- Designed to tackle the complexities of event planning, coordination and execution in today's fast-paced world.
- It revolves around three core entities: User, Event, and Ticket.
- Simplifies event management for professionals, enhancing the overall event experience and ensuring success.

Features & Functionalities

- User Authentication and Authorization
- Event Management
- Event Listings
- Event Registration
- User Profiles
- Notifications
